

I am opposed to Sinclair Broadcasting Group preempting programs in order to show a free 90 minute political ad. People will be arguing about Vietnam for a long time. It is, I feel, a mute subject in today's world. I am concerned about the huge influence of corporate media--whose interests and agenda do not match those of the average Americans in most cases.

I would really like to see 'fair and balanced' reporting in all communication networks. A dream I know.
